

## TECHNICAL SPECIFICATION SHEET

### 125MM SUPPLY DIFFUSER

404156

**125mm Supply Adjustable Air Valves** have been designed to be aerodynamic to be kind to airflows. The open area of the valve is adjustable because of a threaded bar which can be locked in position.

**Key features:**

- Manufactured from white polypropylene (RAL 9010).
- The valve is difficult to ignite (Will not burn with open flame)
- The valve material has a melting point between 150-180°C
- The valve resists temperatures up to 110°C without deformation
- High valve body improving air flow/less noise
- Closed disc
- No leakage between valve body and connection bush
- Variable volume flow control
- Suitable for rooms with high air humidity (e.g. kitchen, bathroom)
- Simple removal for cleaning

**Dimensions:**

Product	A	B	C	D
	100mm	168mm	106mm	20mm
